Mail Stop REISSUE Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

INFORMATION DISCLOSURE STATEMENT

Sir:

Pursuant to 37 C.F.R. §§ 1.56, 1.97 and 1.98, Applicants identify the documents listed on the attached Substitute Form 1449A/PTO accompanying this submission.

Remarks

Applicants regret that such a voluminous disclosure is required in the present case; however, these materials have been identified in litigations involving the patent that is the subject of the present reissue application and, in an abundance of caution, are provided to the Examiner. In light of the volume of information identified, Applicants specifically identify below items that the opposing parties in the litigations have particularly identified as allegedly invalidating, or as allegedly material to patentability of, one or more claims of the patent that is the subject of the present reissue application (along with information that may be related to such references). The identification of these alleged references is not intended to indicate in any way that other information provided should not be considered by the Examiner. A copy of this Information Disclosure Statement will be provided to each of the opposing parties in the litigations so that the opposing parties may submit any additional information regarding the cited references and/or additional references to the Patent Office. Additionally, Applicants will provide any further information the Examiner may desire with regard to any of the information identified to the extent Applicants have such information and can provide it to the Patent Office consistent with the Protective Orders.

Reissue of U.S. Patent No. 6,430,467

Issued: August 6, 2002

Page 2

The assignee of the present application, Rock-Tenn Company ("Rock-Tenn"), is presently engaged in five litigations (four of which are consolidated) concerning the original patent in the present reissue application, United States Patent No. 6,430,467 ("the '467 patent"). The opposing parties in the litigations have alleged that certain materials constitute prior art to the '467 patent. The materials identified by the opposing parties, additional documents that may relate to those materials, and documents submitted in the litigations, are listed in the attached Substitute Form 1449A/PTO. The opposing parties have not provided Applicants with copies of all of the documents and materials that the opposing parties have identified, and the opposing parties designated other documents and materials as confidential under the terms of the Protective Orders entered in the litigations. Additionally, the opposing parties' descriptions of some of the alleged prior art is so vague that Applicants have not been able to determine whether any documentation exists concerning such alleged prior art.

Applicants, therefore, enclose only copies of the non-confidential materials that the opposing parties have produced in the litigations or that Applicants have been able to identify and obtain. Using the verbatim language chosen by the opposing parties in the litigations, these materials are listed as items 1-145, 197-202, 222, and 249-251 on the attached Substitute Form 1449A/PTO. Enclosed documents that may relate to the materials identified by the opposing parties are listed as items 146-148 on the attached Substitute Form 1449A/PTO. Documents submitted in the litigations such as pleadings, discovery responses, and motions that are enclosed herewith are listed as items 149-196 and 246-248 on the attached Substitute Form 1449A/PTO.

Items 203-221 and 223-245 on the attached Substitute Form 1449A/PTO are not enclosed herewith. Items 203-208 are documents that the opposing parties have designated as confidential under the Protective Orders entered in the litigations. Items 209-220 and 223-245 are materials that the opposing parties have vaguely characterized as trays or lids, product brochures, advertisements, tray sealing systems, prepared meals and the like. Because of the vague nature of these descriptions, Applicants have not been able to determine whether any documentation exists concerning these alleged prior art materials, and hence copies are not enclosed. Finally, item 221 is an alleged reference that the opposing parties have not provided to Rock-Tenn and that Applicants have not been able to otherwise obtain. Items 209-221 and 223-245 are listed on the attached Substitute Form 1449A/PTO using the

Reissue of U.S. Patent No. 6,430,467

Issued: August 6, 2002

Page 3

verbatim language used by the opposing parties in the litigations to identify these items. If Applicants obtain further information regarding these materials or copies of these materials, Applicants will provide the PTO with the additional information or copies of the materials.

Some of the documents listed in the attached Substitute Form 1449A/PTO were considered by the Examiner during prosecution of the original '467 patent. These documents are listed on the attached Substitute Form 1449A/PTO as item numbers 1, 12-13, 28-29, 32, 34-35, 37-38, 40, 43, 45-46, 50-52, 54-55, 57, 59-65, 67, 73, 75, 77, 80, 82-84, 87, 90, 93, 95-96, 98-99, 101-106, 109-110 and 117-119.

In view of the above discussion, the Examiner's attention is drawn to the following non-confidential references identified by item #:1

- #8. United States Patent No. 3,353,707 ("the '707 patent"). In the litigations, at least some of the opposing parties contend that the '707 patent anticipates or renders obvious independent Claims 10 and 20 of the original '467 patent, and the claims depending from Claims 10 and 20. See item #154 at 6; item #176 at 15; and item #181 at 17 and 21.
- #13. U.S. Patent No. 3,563,445 ("the '445 patent"). In the litigations, at least some of the opposing parties contend that the '445 patent anticipates or renders obvious independent Claims 1 and 20 of the original '467 patent, and the claims depending from Claim 1 and 20. See item #154 at 6; and item #181 at 21.
- #34. United States Patent No. 3,997,101 ("the '101 patent"). In the litigations, at least some of the opposing parties contend that the '101 patent anticipates or renders obvious independent claim 20 of the original '467 patent, and the claims depending from independent claim 20. See item #154 at 6; and item #181 at 21.
- #119. Photograph of MAPfresh product. In the litigations, the opposing parties contend that a photograph of a MAPfresh product that was submitted to the Patent Office

^{&#}x27;Applicants also provide specific citations to litigation materials where the opposing parties make arguments that these specific references allegedly are invalidating prior art to, or allegedly are material to the patentability of the invention of, the original '467 patent. In providing these citations, due to the volume of litigation materials, Applicants may not have included a citation to each and every such litigation document. It is believed, however, that the citations reflect the opposing parties' positions regarding these specific references. A copy of this Information Disclosure Statement will be provided to each of the opposing parties to the litigations so that the opposing parties may submit any additional citations and/or additional information or references that the opposing parties believe should be provided to the Patent Office.

Reissue of U.S. Patent No. 6,430,467

Issued: August 6, 2002

Page 4

during prosecution of the original '467 patent is prior art to, and/or material to the patentability of, the original '467 patent. See item #155 at 6-8 and 14-15; item #165 at 9-10; item #173 at 6-7 and 11-12; item #176 at 20-21; item #182 at 6-7 and 12-13; and item #184 at 8. The MAPfresh product in the photograph is not believed by Applicants to be prior art to the '467 patent. The photograph is of a tray sold by one of the opposing parties in the litigations, Clear Lam, which tray is accused of being used in processes that infringe the claims of the '467 patent. Applicants believe that the tray shown in the photograph did not exist, and was not commercially available, prior to July 12, 1999. The photograph of the MAPfresh product was mistakenly submitted to the Patent Office during prosecution of the original '467 patent.

#120 and #121. Rock-Tenn Advertisement ("Rock-Tenn Advertisement"). In the litigations, the opposing parties contend that a Rock-Tenn Advertisement anticipates or renders obvious independent Claim 20 of the original '467 patent, and the claims depending from independent Claim 20, and/or allegedly is material to the patentability of the original '467 patent. See item #153 at 15 and 21-22; item #154 at 1, 6; item #155 at 8-9 and 15-16; item #165 at 10-11; item #173 at 7-8 and 12-13; item #176 at 21-22; item #181 at 12-13, 21 and 25-26; item #182 at 7-8 and 13-14; item #187 at 9 and 13-14; and item #190 at passim.

#122. Holly Farms Whole Chicken Tray. In the litigations, the opposing parties contend that a Holly Farms Whole Chicken Tray anticipates or renders obvious all of the claims of the original '467 patent. *See* item #153 at 15; item #154 at 3, 6; item #181 at 13 and 21; and item #187 at 9.

#123, #124, #125 and #143. October 6, 2000 letter from Clear Lam to Rock-Tenn (item #143), and the enclosures to the letter (item #123, 124 and 125). (The remainder of the information described in the October 6, 2000 letter also is listed item by item on the attached Substitute Form 1449A/PTO as item numbers 52, 64, 84, 93, 125 and 237-245.) In the litigations, the opposing parties contend that information contained in, and enclosed with, a letter dated October 6, 2000 from Clear Lam to Rock-Tenn constitutes invalidating prior art to the original '467 patent, and/or allegedly is material to the patentability of the invention of the original '467 patent. See item #153 at 16 and 20-22; item #154 at 3; item #155 at 6-8 and 13-15; item #165 at 9-10; item #173 at 5-7 and 11-12; item #176 at 20-21; item #181 at 13 and 24-26; item #182 at 5-8 and 11-14; item #184 at 7-8; and item #187 at 13-14.

Reissue of U.S. Patent No. 6,430,467

Issued: August 6, 2002

Page 5

#126. C&M Fine Pack Tofu Tray ("Tofu Tray"). In the litigations, at least some of the opposing parties contend that a C&M Fine Pack Tofu Tray is relevant and/or invalidating prior art to the original '467 patent. *See* item #153 at 16; item# 154 at 3; item #164 at 5; item #181 at 13; and item #187 at 8.

#127. Eastman Ad. In the litigations, at least some of the opposing parties contend that the Eastman Ad anticipates or renders obvious all of the claims of the original '467 patent. See item #153 at 13; item #154 at 3, 6; item #181 at 13; and item#187 at 4.

#145. Undated videotape of Map Systems' Equipment. In the litigations, at least some of the opposing parties, allege that an undated videotape (approximately six minutes in length) of alleged Map Systems' equipment allegedly invalidates one or more the claims of the original '467 patent. *See* item #246 at 12-13 and 16-17; item #247 at 11; and item #248 at 2 and 7-8.

#146, #147, #148, #215 and #252. The Champion Deep Meat Tray and potentially related materials. In the litigations, the opposing parties contend that a "Champion deep meat tray" (item # 215) anticipates or renders obvious independent Claim 20 of the original '467 patent, and the claims depending from independent Claim 20; and/or allegedly is material to the patentability of the invention of the original '467 patent. *See* item #153 at 16 and 22; item #154 at 3, 6; item #181 at 13, 21 and 25-26; and item #187 at 10 and 14. As discussed in item #252, item numbers 146-148 may relate to the "Champion deep meat tray."

#197, #198, and #199. Unsigned Map Systems' Proposals to Excel, Perdue, and Jac Pac, and facsimile records allegedly showing that Excel and Jac-Pac received their respective proposals via facsimile. In the litigations, at least some of the opposing parties contend that these proposals allegedly are offers for sale that allegedly invalidate many of the claims of the original '467 patent. *See* item #188 at 1-2; item #190 at *passim*; item #192 at 2-3 and 4-5; item #194 at 1-4; item #246 at 1-2, 11-12, 20, and 23-35; item #247 at 16-20 and 42-49; and item #248.

#246. Memorandum In Support Of Defendants' Motion For Summary Judgment On Patent Invalidity. This brief sets forth Cryovac, C&M Fine Pack and Anchor's position that the original '467 patent allegedly is invalid because more than one year prior to the date of the patent application that led to issuance of the original '467 patent, Clear Lam allegedly made written offers for sale of the claimed invention to Excel Corporation ("Excel"), Perdue Farms

Reissue of U.S. Patent No. 6,430,467

Issued: August 6, 2002

Page 6

("Perdue"), and Jac-Pac Foods, Inc. ("Jac-Pac"); and/or because the claimed process allegedly was invented by persons other than Rock-Tenn.

#247. Defendants' Statement of Undisputed Facts. This statement was submitted in support of the brief listed in item #246 and allegedly supports Cryovac, C&M Fine Pack and Anchor's contentions that the original '467 patent allegedly is invalid because more than one year prior to the date of the patent application that led to issuance of the original '467 patent, Clear Lam allegedly made written offers for sale of the claimed invention to Excel, Perdue, and Jac-Pac; and/or because the claimed process allegedly was invented by persons other than Rock-Tenn.

#248. Declaration of James J. Sanfilippo and Accompanying Exhibits. This declaration and accompanying exhibits was submitted in support of the brief listed in item #246 and allegedly supports Cryovac, C&M Fine Pack and Anchor's contentions that the original '467 patent allegedly is invalid because more than one year prior to the date of the patent application that led to issuance of the original '467 patent, Clear Lam allegedly made written offers for sale of the claimed invention to Excel, Perdue, and Jac-Pac; and/or because the claimed process allegedly was invented by persons other than Rock-Tenn.

#143, #144, #145, #197, #198, #199, #200, #201, #202, #249, #250, and #251. These items are the exhibits that also accompanied item #248. Cryovac, C&M Fine Pack and Anchor allege that these items constitute materials corroborating their allegations that the original '467 patent allegedly is invalid because more than one year prior to the date of the patent application that led to issuance of the original '467 patent, Clear Lam allegedly made written offers for sale of the claimed invention to Excel, Perdue and Jac-Pac; and/or because persons other than Rock-Tenn allegedly invented the process claimed in the original '467 patent. See also item #246 at 12-19 and 35-42; item #247 at 21-22 and 31-49; and item #248 at 23-33.

It is requested that these references be considered by the Examiner and officially made of record in accordance with the provisions of 37 C.F.R. 1.97 and Section 609 of the MPEP.
